1. The import data was sourced from the "Statistics Database Query" of the Customs Administration, Ministry of Finance (The data was obtained on September 24, 2026) and from the responses submitted to the industry injury investigation questionnaires collected in this investigation.
2. Data on the domestic industries is based on questionnaire responses from the domestic producer, China Steel Corp.

Note:

1.The base year is 2022.

2.Apparent Demand = Domestic sales + Total imports.

1. The import data was sourced from the "Statistics Database Query" of the Customs Administration, Ministry of Finance (The data was obtained on September 24, 2026) and from the responses submitted to the industry injury investigation questionnaires collected in this investigation. For import price, an additional 2.5% of the CIF value was included to account for port unloading fees, customs was included clearance fees, trade promotion service fees, and transportation costs.
2. Data on the domestic industries is based on questionnaire responses from the domestic producer, China Steel Corp. Shipping charges have been deducted from price of domestic sales; inland freight, ocean freight, insurance and customs clearance fees have been deducted from price of export sales.

Note:

1.The base year is 2022.

Note:

1. Productivity = Weighted-average Productivity (production ÷ one thousand working hours)
2. Utilization of capacity = production ÷ average capacity
3. Non-operating investment Income is not included.
4. Return of Investment = Net profit after tax on similar goods ÷ Total assets used in the production of those goods.
5. Cash Flow is Operating Cash Flow.
6. Employment refers to the number of employees engaged in production and production-related activities of the domestic manufacturer.
7. Hourly Wages = Total Wage ÷ Total Working hours
